

# Protecting Healthcare from Cyber Threats

Enhance your cybersecurity maturity with NVISO by harnessing the power of Microsoft XDR solutions. Our expert team will elevate your defense strategy through the seamless integration of cutting-edge SOAR and MDR services, maximizing the potential of your technology investments.

## XDR

Detect and respond to threats faster with unified security insights

## SOAR

Enables you to automate security tasks and respond to incidents efficiently.

## MDR

Provides you with expert-driven threat detection and rapid response.

## Our services

### XDR deployment & configuration

To help you, as a Shield constituent, enhance your cyber security posture, NVISO can assist you in adopting and XDR tool.

As recognised Microsoft partner, NVISO offers E5/A5/F5 security licenses for users and Microsoft Defender for Endpoint P2 licenses for endpoint and servers.

We can support you in deploying of Microsoft defender XDR. To achieve this, we will use best-practice configurations of the Microsoft Security Stack.

### Security Orchestration, Automation & Response

As the next step, NVISO will support you in implementing automation through playbooks, streamlined incident management via a centralized interface, and improved team collaboration.

To achieve these capabilities, NVISO will leverage Microsoft Sentinel and Logic Apps.

Our team will manage the initial installation, configuration, and deployment of the SOAR platform and playbooks, ensuring a smooth transition before handing over the system to you.

### Managed Detection & Response

Safeguard your healthcare organization with NVISO's Managed Detection and Response (MDR) services. Leveraging over a decade of cybersecurity expertise in numerous playbooks and our state-of-the-art NITRO platform, we provide 24/7 monitoring and rapid threat detection across your IT infrastructure.

Ensuring peace of mind and reduced costs. Choose NVISO for comprehensive cybersecurity solutions that address your key challenges with efficiency and reliability.
