

# Your Trusted Partner in Cybersecurity & Data Networking

## About Jarviss

Jarviss is an integrator and managed security service provider specializing in **data networking and cybersecurity**. Established in 2020, we operate in **two countries with three locations** and have a team of over **30 passionate specialists**. Our expertise spans **cybersecurity, and data networking**, with a **focused approach on select technologies**.

## Key Offerings - SHIELD XDR, SOAR and MDR services

### XDR Platform: Incident determination & analysis

- **Data Lake:** Centralized log collection
- **EDR:** Endpoint security
- **ITDR:** Identity security
- **Email Security:** Protection and telemetry integration

### SOAR (Security Orchestration, Automation & Response)

- **Automated SOC** with enrichment & response
- **XSOAR platform** for centralized automation

### Managed Detection & Response

- **Human intelligence + automation** for in-depth incident analysis and response

## Technology Stack & Integrations

- **Palo Alto Networks Cortex XDR:** Industry-leading endpoint security
- **Cortex ITDR:** User behavior monitoring & identity security threat detection.
- **Silverfort:** Advanced **Identity Threat Detection & Response (ITDR)**, enabling **risk-based authentication policies**.
- **Avanan:** **Inline email security & DLP protection** for Microsoft 365 and Google solutions.
- **Palo Alto Networks XSOAR Automation:** AI-driven automation for security alerts, **integrating data from multiple sources** (EDR, ITDR, NDR, and Email Security).

Jarvis (Just Another Rather Very Intelligent System) is an AI-based butler. Much like the role a butler provides, Jarviss aims to provide a discreet, personal and intelligent service to his customers. With the extra S in Jarviss, we underline the focus on Security. In practice, Jarviss is a team of passionate and committed network & security professionals with proven experience in the Belgian market.

# AI-Driven Cybersecurity

## Managed XDR

24x7 automated detection & response

## Managed XDR services & Additional Offerings

### Incident Processing & Response

Actionable insights, automated threat hunting, and enrichment from various security feeds.

### Security Control Baseline Testing

Validation of security effectiveness across several area's in your network.

### Threat Hunting

AI-driven, continuous monitoring and proactive threat detection.

### Eyes on Screen

Jarviss SOC analysts process incidents before reaching the client.

### BASIC MODEL

Vendor-driven, with Jarviss on standby (office hours, pay-as-you-go).

### Advanced MODEL

8/5 or 24/7 support & co-managed options.

### Fully Managed MODEL

Complete operational management by Jarviss.

## Why Choose Jarviss?

- ✓ Expert-led security solutions with automation & human intelligence
- ✓ Industry-leading technologies (Palo Alto Networks, Silverfort, Avanan)
- ✓ Proactive threat detection with AI-powered security
- ✓ Flexible service models tailored to your business needs
